# MADE IN ITALY

## CONTRACT FURNITURE

As pure expression of Made in Italy, Gaber interprets that balance between craftsmanship and industry by creating furnishings able of satisfying the tastes and needs of its international audience, with a high level of customization and a wide range of finishes.

Pura espressione del Made in Italy, Gaber interpreta quell'equilibrio tra artigianato e industria che si realizza in arredi capaci di soddisfare gusti ed esigenze di un pubblico internazionale, con un alto livello di personalizzazione e ampia gamma di finiture.

### IN THE NATURAL RESPECT

Gaber designs, develops and produces furniture for the world of contract, responding to the needs of design, flexibility and quality thanks to the high level of expertise achieved in the molding of plastics and processing metal.

Since 2000, Gaber has avoided the use of pollutants and has instead encouraged the use of the most valued recycled materials. Safeguarding the environment and a continual search for eco-friendly solutions play an important role within our company where, in recent years, all new launches have been designed and manufactured with respect for our natural environment.

Gaber progetta, sviluppa e produce arredi per il mondo del contract, rispondendo alle esigenze di design, flessibilità e qualità grazie all'alto livello di competenza raggiunto nello stampaggio delle materie plastiche e nella lavorazione del metallo.

Dal 2000 Gaber ha evitato l'uso di sostanze inquinanti, incoraggiando invece, l'uso dei materiali riciclati. La salvaguardia dell'ambiente e la continua ricerca di soluzioni eco-compatibili giocano un ruolo importante all'interno dell'azienda dove tutti i nuovi prodotti sono progettati e realizzati nel rispetto dell'ambiente naturale.

## WORKSPACES COLLECTION

Gaber is a project partner: from reception to operative spaces, from executive offices to meeting rooms, encompassing waiting areas, without forgetting the breakout areas, we offer you a freedom of design and also of interpretation of your space of work.

Gaber è partner di progetto: dagli spazi di accoglienza a quelli operativi, dagli uffici direzionali alle sale meeting, ai luoghi di attesa, senza dimenticare la pausa caffè, vi proponiamo una libertà di progettazione e di interpretazione del vostro spazio di lavoro.

## ACOUSTIC COLLECTION

The places of sharing and meeting must be able to accommodate different identities and know how to adapt to everyone's taste. The space becomes a container of sounds and words, declined in compositions of colors and furnishings that become part of a sensorial experience.

I luoghi di condivisione e di incontro devono poter accogliere identità diverse e sapersi adattare al gusto di ognuno. Lo spazio diventa contenitore di suoni e parole, declinati in composizioni di cromie e arredi che diventano parte di un'esperienza sensoriale.

## HOSPITALITY COLLECTION

Impactful, functional and colorful furnishing helps hosting guests, together with their combining in space and overlapping, creating formidable architecture and shades. Arredi di impatto, funzionali e colorati aiutano a ricevere i propri ospiti, insieme al loro combinarsi nello spazio e al sovrapporsi creando architetture e sfumature formidabili.

## OUTDOOR COLLECTION

Making guests feel at ease in the relax areas happens thanks to the combination of functional objects and an unexpected detail. Far sentire a proprio agio gli ospiti nelle aree relax avviene anche grazie all'abbinamento tra oggetti funzionali e quel dettaglio che non ti aspetti.

# MATERIALS

## TECHNOPOLYMER

Gaber production employs exclusively high-tech thermoplastic materials, which are 100% recyclable. Each techno-polymer item is marked with a specific symbol, which shows the kind of polymer for a quick identification and a consequent recycling. Gaber produces plastic injected materials without added chemicals. These materials are purchased within the European Union, so Gaber is exempted from registration with ECHA agency (European Agency for Chemicals Substances), in the complete respect of "Reach Regulation". As far as possible, recycled plastics are sourced as a base raw material, recovered post-consumption.

La produzione Gaber impiega esclusivamente materiali termoplastici altamente innovativi, riciclabili al 100%. Ogni articolo in tecnopolimero è contrassegnato da un simbolo specifico, che identifica il tipo di polimero per una rapida identificazione ed un conseguente corretto riciclaggio. Gaber produce materiali in tecnopolimero iniettato senza aggiunta di sostanze chimiche. Questi materiali sono acquistati all'interno dell'Unione Europea, pertanto Gaber è esente dalla registrazione presso l'agenzia ECHA (Agenzia europea per sostanze chimiche), nel pieno rispetto del "Reach Regulation". Per quanto possibile, i materiali plastici riciclati vengono acquistati come materia prima di base, recuperati da post-consumo.

## METAL

Gaber metal structures, in the full respect of our natural environment, are available with "trivalent" chroming and painted finishes. Prime-quality special epoxy powder coating used on Gaber frames enhance color stability from batch to batch and over time, increasing its corrosion resistance and achieving excellent resistance to atmospheric agents.

Le strutture metalliche Gaber, nel pieno rispetto del nostro ambiente naturale, sono disponibili con cromature "trivalenti" e finiture vernicate. La speciale verniciatura a polvere epossidica di prima qualità utilizzata sui telai Gaber migliora la stabilità del colore da lotto a lotto e nel tempo, aumentandone la resistenza alla corrosione e ottenendo un'ottima resistenza agli agenti atmosferici.

## WOOD

Wooden products are manufactured in accordance with the European Regulations in force regarding formaldehyde emissions from wood-based products (E1 according EN717-EN120). Gaber uses wooden raw materials coming from PEFC chain of custody certified materials.

I prodotti in legno sono realizzati in conformità alle Normative Europee vigenti in materia di emissioni di formaldeide da prodotti a base di legno (E1 secondo EN717-EN120). Gaber utilizza materie prime in legno provenienti da materiali certificati catena di custodia PEFC.

## PACKAGING

Corrugated paperboard carton boxes, printed with environmentally friendly inks, are made of at least 80% recycled and recyclable materials, coming from the chain custody FSC Recycled. Packaging is sized in order to optimize storage and transport requirements, both helping the environment and saving on transport costs.

Le scatole di cartone ondulato, stampate con inchiostri ecologici, sono realizzate almeno per l'80% con materiali riciclati e riciclabili provenienti dalla catena di custodia FSC Recycled. Gli imballi sono dimensionati in modo da ottimizzare le esigenze di stoccaggio e trasporto, sia a favore dell'ambiente che di risparmio sui costi di trasporto.

# FUNCTION DESIGN AND SUSTAINABILITY

## ALHAMBRA AND EPICA ECO: SUSTAINABLE PRODUCTS

Compound Wood by Gaber is an advanced bio-composite where natural wood fibres are incorporated into a polyolefin matrix in order to produce a "Triple-way Ecological" material achieved by using wood shavings, in their turn completely recyclable, and without the need for any protective polluting treatments.

Compound Wood di Gaber è un Bio-Composito avanzato nel quale le fibre di legno naturali sono incorporate in una matrice poliolefinica per produrre un materiale "3 volte Ecologico" perché utilizza derivati dalla lavorazione del legno, a loro volta completamente riciclabili e non necessita di trattamenti inquinanti protettivi del legno.

## LILIBET AND TO-ME: ZERO WASTE COLLECTION

Gaber technopolymer products are made with high quality raw materials: 100% recyclable and eco-friendly. In the zero waste collection, Gaber products are made of completely recycled material.

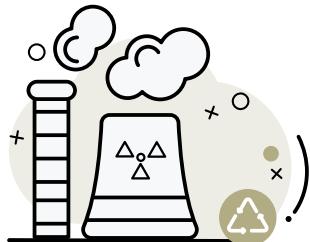

I prodotti in tecnopoliomeri Gaber sono realizzati con materie prime di alta qualità: 100% riciclabili ed eco-compatibili. Nella collezione zero waste, i prodotti Gaber sono realizzati con materiale completamente riciclato.

# RECYCLING UNIT

RECYCLE

REDUCE

REUSE

When a production chain works at its best, it also prevents the creation of waste, saves resources and reduces any impact on the environment. To ensure the sustainability of its activities, Gaber invests in latest generation technologies, thanks to which energy consumption is reduced and waste materials reused.

Gaber Recycling Unit is a division of Gaber s.r.l. that allows the recycling of plastic and metal materials from post-industrial consumption, automatically optimizing the separation of different raw materials, which are thus reused in subsequent production runs.

Quando una catena produttiva funziona al meglio, previene anche la creazione di rifiuti, risparmia risorse e riduce l'impatto sull'ambiente. Per garantire la sostenibilità delle proprie attività, Gaber investe in tecnologie di ultima generazione, grazie alle quali viene ridotto il consumo di energia e vengono ri-utilizzate le materie di scarto.

Gaber Recycling Unit è una divisione di Gaber s.r.l. che permette il riciclo delle materie plastiche e metalliche da post consumo industriale, differenziando al meglio ed in modo automatico i diversi materiali componenti dei prodotti, che vengono così riutilizzati per una nuova produzione.

## SAFE PRODUCTS

In all components, parts or materials used by Gaber to make its own products, be they plastic or metal, there are no dangerous substances within the certified limits of the following test methods reports:

In tutti i componenti, parti o materiali utilizzati da Gaber per realizzare i propri prodotti, siano essi plastici o metallici, non sono presenti sostanze pericolose nei limiti certificati dei seguenti metodi e rapporti di prova:

## AUTORI DI PROGETTI E DI EMOZIONI

**ALESSANDRO BUSANA**

Italy

Born in Padova (Italy) in 1977. From Scuola Italiana Design he graduated in industrial design in 1999, continues its path of specialization with workshops for Rollerblade, Fila, Whirlpool, Alfa Romeo, Chicco, Roncato and Alessi. Since 2004 he made creative design, focused on the functionality of the products and attends national and international avantgarde exhibitions, (like The New Italian Design 2007/2010, Nazionale Italiana Design, Openhouse, Wonderful Water World, Made For China, DISCOVERING Temporary Museum of New Design, STUF...JUSTHINGS? Triennale di Milano ), and he's published in the most important design magazines. In 2009 he founded "hOle designstudio", a new concept development agency, where creates products for big national and international companies.

Nasce a Padova nel 1977. Nel 1999 si diploma in industrial design presso Scuola Italiana Design, prosegue il suo percorso di specializzazione partecipando a workshop per Rollerblade, Fila, Whirlpool, Alfa Romeo, Chicco, Roncato ed Alessi. Dal 2004 si occupa di progettazione creativa orientata al design di prodotto, partecipa a mostre d'avanguardia in ambito nazionale ed internazionale, (come The New Italian Design 2007/2010, Nazionale Italiana Design, Openhouse, Wonderful Water World, Made For China, DISCOVERING Temporary Museum of New Design, STUF...JUSTHINGS? Triennale di Milano ), ed è pubblicato dalle principali riviste di settore. Nel 2009 fonda "hOle designstudio", contenitore di ricerca e sviluppo concept, creando prodotti per importanti aziende in ambito nazionale ed internazionale.

Gaber's key designers bring different a variety of experience to the development of concepts and products. Each of them has been able to understand, each with their own sensibility, Gaber character and style.

I designer che collaborano a stretto contatto con Gaber portano diverse esperienze per lo sviluppo di concetti e prodotti. Tutti loro sono stati in grado di comprendere, ognuno con la propria sensibilità, il carattere e lo stile di Gaber.

**FAVARETTO&PARTNERS**

Italy

Studio Favaretto since 1973, Favaretto&Partners Design Studio from 2009. Curiosity, tenacity and passion for research have characterized our work of industrial design, consulting and interior architecture.

Anticipating trends to exploit opportunities offered by the global market. Our multidisciplinary approach, drawn from our expert knowledge, creates development and international industrial business. Creativity is a constant throughout the entire production process. Seeking innovative solutions, focussing on product circularity and cultivating a sustainable approach to the future are what set us apart from the rest.

Studio Favaretto dal 1973, Favaretto & Partners Design Studio dal 2009. Curiosità, tenacia e passione per la ricerca caratterizzano il nostro lavoro di design industriale, consulenza e architettura d'interni. Anticipare le tendenze per cogliere le opportunità offerte dal mercato globale. L'approccio multidisciplinare, frutto del nostro know-how, crea sviluppo e business industriale di respiro internazionale.

La creatività accompagna tutto il percorso produttivo. La ricerca di soluzioni innovative e l'attenzione alla circolarità dei prodotti, così come lo sguardo sostenibile proiettato al futuro, sono i tratti che ci distinguono.

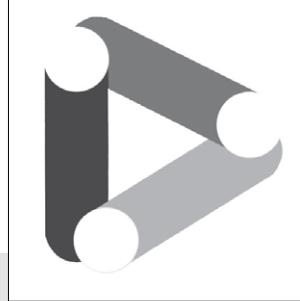

### MARC SADLER

Austria

French citizen, born in Austria, Marc Sadler has lived and worked in France, North America, Asia and Italy. One of the first graduates in "esthétique industrielle" at the ENSAD in Paris with a thesis on plastics, he was a pioneer in experimentation on the different materials and contamination between technologies, which have become distinctive aspects of his work. At the beginning of the seventies, he's perfected the first ski-boot in thermoplastic material completely recyclable, subsequently commercialized by the Italian firm Caber. Today, thanks to his eclecticism, he's a consultant for a wide range of industry companies. Awarded 4 times with the Compasso d'Oro by ADI, the Industrial Design Association, (1994, 2001, 2008 e 2014) his work has won many international design awards over the years.

Franceso, nato in Austria, Marc Sadler ha vissuto ed esercitato la professione di designer in Francia, Stati Uniti, Asia e Italia. Uno dei primi laureati in "esthétique industrielle" all'ENSAD di Parigi con una tesi sulle materie plastiche, è stato pioniere della sperimentazione dei materiali e della contaminazione fra le tecnologie, divenute aspetti distintivi della sua attività. All'inizio degli anni '70 mette a punto il primo scarponcino da sci in materiale termoplastico interamente riciclabile, poi industrializzato dall'italiana Caber. Oggi grazie al suo eclettismo è consulente trasversale di aziende di ogni settore dell'industria. Vincitore 4 volte del Compasso d'Oro ADI, l'Associazione Design Industriale, (1994, 2001, 2008 e 2014) il suo lavoro è stato premiato molte volte a livello internazionale nel corso degli anni.

### EUROLINEA

Italy

The result of years of experience in the design of plastic, Eurolinea develops its activities by designing products ranging from furnishings such as chairs, tables, stools to get to the creation of household items and packaging, such as reusable containers, and other accessories.

The large knowledge in engineering and industrial production of products and special Eurolinea pole makes cutting-edge technologies and solutions that are functional and innovative.

Frutto di anni di esperienza nella progettazione di manufatti plastici, Eurolinea sviluppa la sua attività ideando articoli che spaziano dai complementi d'arredo come sedie, tavoli, sgabelli per arrivare alla creazione di oggettistica per la casa e imballaggio, come contenitori multiuso, ed altri accessori. La grande conoscenza nel campo dell'ingegnerizzazione e industrializzazione di articoli e particolarità di Eurolinea polo di tecnologie sempre all'avanguardia e soluzioni sempre funzionali ed innovative.

### FORSIX

Italy

Six complementary souls for interdisciplinary approaches to creation. Experts in industrial and environmental design, synthesizers of aesthetic and emotional approaches, creators of furnishings and decoration sets and sceneries, image managers and masterplanning: Forsix combines the development of iconic, elegant and functional products, with marketing and Corporate art-direction. The creative approach of Forsix Industrial Design is to bypass the common obstacles in the products development through the use of innovative production technologies, the result of continuous research and prototyping, materials and processes knowledge.

Sei anime complementari per approcci interdisciplinari alla creazione. Esperti nel disegno industriale ed ambientale, sintetizzatori di approcci estetici ed emotivi, creatori di allestimenti e scenografie dell'arredamento e della decorazione, gestori dell'immagine e del masterplanning: Forsix coniuga lo sviluppo di prodotti iconici, eleganti e funzionali, alla comunicazione e all'Art Direction aziendale. L'approccio creativo di Forsix Industrial Design è quello di aggirare i comuni ostacoli nella realizzazione dei prodotti attraverso l'utilizzo di innovativi sistemi di produzione, frutto di una continua ricerca e prototipazione, della conoscenza dei materiali, della conoscenza dei processi.

### STEFANO SANDONÀ

Italy

Dialogue between different languages and cultures.

Stefano Sandona's creations are products of the elements of contemporary culture: graphism, the digital world, continuous motion.

Inspiration drawn from travel, architecture and landscapes.

Born in 1974, later undergoing an artistic education, since 1996 he has been working with professional design firms and several companies specialized in chairs, stools, tables and other types of system seating for the home, the office and the contract sector.

He makes elaborate and dynamic products economically compatible with the client and the market, and works in collaboration with some companies which are able to take the project from the idea to production, with a high quality level. In 2006 he founded STEFANO SANDONA DESIGN. Its activities range from industrial design to product consulting and production, focusing especially on furniture. In just a few years he has received numerous awards and his works are present in museums and exhibitions.

Dialogo tra diversi linguaggi e culture. Le creazioni di Stefano Sandona' sono frutto della contaminazione degli elementi della cultura contemporanea: grafismo, mondo digitale, movimento. Ispirazioni tratte da viaggi, architetture e paesaggi. Nato nel 1974, dopo una formazione artistica, dal 1996 collabora con altri studi professionali e aziende nei settori casa, ufficio e contract, in particolare nella creazione e sviluppo di sistemi di sedute. Crea prodotti di forte processualita' e dinamismo, economicamente compatibili con l'azienda e il mercato, e grazie alla collaborazione con altre aziende, può portare il progetto dall'idea fino alla produzione, ad alti livelli di qualità. Nel 2006 fonda lo studio STEFANO SANDONA DESIGN. Le sue attivita' spaziano dall'industrial design al product consulting, agli allestimenti, concentrandosi in modo particolare nel settore furniture.

In pochi anni ha ricevuto prestigiosi riconoscimenti internazionali e i suoi lavori sono presenti in musei ed esposizioni.

**GIAMPAOLO ALLOCCHI**  
Italy

Delineo derives from the latin word meaning "the one who designs". Delineodesign is the pseudonym I use for my projects. After my industrial high school diploma I worked in the sport system industry. I built up my self-confidence, I met extraordinary men, exceptional athletes and intelligent managers. I paid my dues and gained experience in product development, engineering, marketing and strategy consulting. I lived and absorbed all the ingenuous and creative energy of the industrial system.

Delineo, deriva dal latino e significa "colui che disegna". Delineodesign è lo pseudonimo con cui firmo i miei progetti. Dopo il diploma industriale ho lavorato nello sport system. Ho conquistato fiducia, ho conosciuto uomini straordinari, atleti formidabili e manager intelligenti. Ho fatto gavetta e assimilato esperienza di product development, di engineering, di marketing e di strategy consulting. Ho vissuto e assorbito dal sistema industriale tutta l'energia propositiva e costruttiva possibile.

**SABRINA BETTINI**  
Brazil

She graduated in Architecture at the University 'St. Paul Mackenzie', and started working at some of the first architectural firms in Brazil and later in Italy, where she moved in 2003, gained significant experience in the field and at the same time he completed his doctorate at IUAV Venice. Sandonà encounter with Stefano Sandonà on a series of collaborations in the field of design to become an integral part of the study.

Si laurea in architettura all'università' Mackenzie di San Paolo, ed inizia a lavorare presso alcuni studi di architettura prima in Brasile e successivamente in Italia, dove, trasferitasi dal 2003, matura significative esperienze sul campo e contemporaneamente ottiene la laurea presso lo IUAV di Venezia. Grazie all'incontro con Stefano Sandonà intraprende una serie di collaborazioni nel campo del design sino a diventare parte integrante dello studio.

**ILARIA MARELLI**  
Italy

Ilaria Marelli, architect and designer, specialized in art direction, product, exhibition and interior design, developing an emotional and experimental approach. Interested in the social and cultural aspect of design, Ilaria Marelli teaches "Innovation design" at Milan Politecnico and Naba, and she promotes ideas on social innovation, such as the first Italian co-housing project. Winner of the "Milano Donna 2008" award and "AlumniPolimi Award 2015" in Architecture.

Architetto e designer, si occupa di consulenza di design: art direction e branding, design di prodotto, interni e allestimenti, lavorando su idee che siano emozionali e sperimentali al tempo stesso. Interessata agli aspetti sociali e culturali della progettazione, è lecturer di "Design Innovation" presso il Politecnico e Naba, e promuove progetti di Social Innovation, tra cui il primo progetto sul cohousing in Italia. Vincitrice del premio "Milano Donna" nel 2008 e dell' "AlumniPolimi Award" 2015 per l'Architettura.

**KRISTINE FLENSTED NIELSEN**  
Denmark

Kristine Flensted Nielsen, designer, art consultant and founder of design studio Firma Fabrik. With a foundation in Scandinavian design tradition, Firma Fabrik creates minimalist designs with attention to production methods and quality materials. Minimalism is both an aesthetic and ethical choice. A well thought out design, free from excessive detail and ornamentation, enables effective production and allows focus to be placed on a responsible and quality-conscious selection of materials. A high-quality, classic simple design and flexible multifunctionality extend each product's lifetime for the joy and benefit of both the user and the environment.

Kristine Flensted Nielsen, designer, consulente d'arte e fondatrice dello studio di design Firma Fabrik. Dalle radici nella tradizione del design scandinavo, Firma Fabrik crea design minimalisti con attenzione ai metodi di produzione e alla qualità dei materiali. Il minimalismo è una scelta sia estetica che etica. Un design ben concegnato, privo di dettagli e ornamenti eccessivi, consente una produzione efficace e consente di concentrarsi su una selezione responsabile e attenta dei materiali. Un design semplice e classico di alta qualità e una multifunzionalità flessibile estendono la durata di ogni prodotto per la gioia e il beneficio sia dell'utente che dell'ambiente.

## COLLECTION

# Nidaba

Forsix Design

The versatile Nidaba collection comes complete with round or oval laminated or compact laminate tops, with a geometric and minimal base that is in 100% recyclable technopolymer. These eye-catching Nidaba tables really do catch the eye and surely do not go unnoticed, thanks to their key feature that allows them to change function as needed. On request, in fact, the round table top has a central hole with a container for plants, flowers, snacks, bottles, toys and more. By selecting Compactops, Nidaba tables become suitable for outdoor use. The oval meeting table can be supplied with two cable routing top access option, in the same material of the table-top, to comfortably utilize electrical devices during meetings. The minimal design of this collection makes sure that it blends perfectly with workspaces or hospitality furniture.

La versatile collezione Nidaba è completa di piani rotondi e ovali in laminato o compactop, con base realizzata in tecnopolimero 100% riciclabile, dal carattere geometrico e minimale. La collezione di tavoli Nidaba cattura l'attenzione grazie al suo punto focale che gli permette di cambiare funzione in base alle esigenze. Il tavolo rotondo è dotato, su richiesta, di un foro centrale in corrispondenza della base in tecnopolimero che accoglie un vaso contenitore per piante, fiori, snack, bottiglie, giocattoli o altro ancora. Utilizzando i piani in Compactop, il tavolo è adatto ad un utilizzo per ambienti esterni. Il tavolo riunione ovale può essere fornito con due accessi passacavi, dello stesso materiale del piano, per poter utilizzare comodamente i dispositivi elettrici durante meeting o riunioni. Il design minimale di questa collezione fa in modo che si integri perfettamente all'arredamento degli spazi di lavoro di lavoro o dell'ospitalità.

Steel top and frame colors / Colori piani Steel e struttura

Steel Slim top and frame colors / Colori piani Steel Slim e struttura

The new Arket table collection is made using basic geometries - radii and linear sections intersect to achieve distinctly intuitive shapes. The aluminum bases have three or four spokes with adjustable feet, and the stems come in sections with three or four surfaces. The table tops are made of steel, with fire resistant composite material core. The tables are thus painted in a solid color and easily customizable and adaptable to the most prestigious of installations.

La nuova collezione di tavoli Arket è realizzata utilizzando le geometrie più elementari, raggi e sezioni lineari si intersecano per ricavare forme essenziali ed intuitive.

I basamenti, a tre o quattro razze, con piedini regolabili, e gli steli, a sezioni con tre o quattro superfici, sono realizzati in alluminio.

I piani sono realizzati in acciaio, dal cuore in materiale composito e resistente al fuoco.

I tavoli sono così verniciati in tinta unita e facilmente personalizzabili ed adattabili alle più prestigiose istallazioni.

The Porcelain stoneware tops stand out for their excellent technical performance, ideal for the most delicate uses where maximum hygiene and resistance must be guaranteed. Porcelain tops are compatible with foodstuffs, resistant to fungi and molds, suitable for both indoor and outdoor use, resistant to frost, heat and high temperatures, they can be cleaned very easily while maintaining the characteristics of the surface.

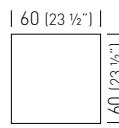

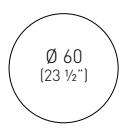

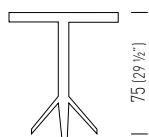

I piani in Gres Porcellanato si distinguono per le eccellenti performance tecniche, ideali negli impieghi più delicati nei quali è necessario garantire la massima igiene e resistenza. I piani Porcelain sono compatibili con le sostanze alimentari, resistenti a funghi e muffe, idonei ad un utilizzo sia interno che esterno, resistenti al gelo, al calore a alle alte temperature, si possono pulire con estrema facilità mantenendo inalterate le caratteristiche della superficie.

# Arket Plus

Forsix Design

Colors / Colori

Arket Plus Collection is made using basic geometrics, achieving distinctly intuitive shapes. The table tops are made of steel, with fire resistant composite material core, the three spokes bases are made of co-injected metal and techno-polymer. Stem and cross are made in aluminum, and provided with flip-top joint. The shape of the base and the flip-top mechanism allow the table to easily fold and stack, space-saving.

La Collezione di tavoli Arket Plus è realizzata utilizzando le geometrie più elementari, ottenendo così forme essenziali ed intuitive. I piani sono realizzati in acciaio, dal cuore in materiale composito resistente al fuoco, la base a tre razze è costituita da una struttura in metallo co-iniettata con tecnopoliomerio. Colonna e crociera sono realizzate in alluminio, dotate di giunto per la rotazione del piano. La forma della base e la meccanica che permette la rotazione del piano rendono il tavolo facilmente accatastabile in spazi ridotti.

# Lol

Forsix Design

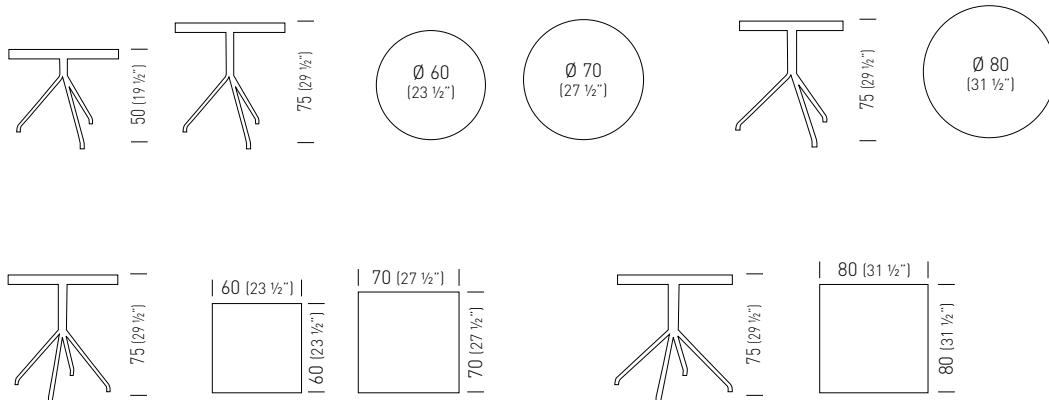

Colors / Colori

The Lol table collection is intended for outdoor use; youthfully simple and sunny, its design blends in discreetly with either the most sparkling or the most sober environments. The table tops with fire resistant composite material core, as well as the bases, are available with three or four spokes, are made up of a metal structure treated for outdoor use, and with a matt finish. The available colour palette is common to many Gaber seating collections, guaranteeing tone-on-tone colour co-ordination throughout designed settings rather than lively contrasts, defining various colour combinations between bases, tops and seating.

La collezione di tavoli Lol, disegnata da Forsix, è ideale per l'utilizzo all'aria aperta: giovane, semplice e solare, il suo design si fonde con discrezione dagli ambienti più sobri a quelli più frizzanti. I piani del tavolo, dal cuore in materiale composito resistente al fuoco, come anche i basamenti, disponibili a tre o quattro razze, sono costituiti da una struttura in metallo trattata per esterni, dalla finitura opaca. La palette di colori disponibile è comune a molte collezioni di sedute Gaber, garantendo abbinamenti tono su tono degli ambienti progettati, piuttosto che vivaci contrasti, definendo diverse combinazioni di colori tra basi, piani e sedute.

The solid Marble surfaces, shiny and glossy, are treated to reduce their porosity, however constant care and cleaning of the product is recommended.

Tag è un tavolino adatto ad aree attesa, realizzato con una struttura metallica dal design minimale. I piani in Marmo, caratterizzati dalle sempre diverse venature della pietra naturale, offrono eleganza e raffinatezza, per completare con esclusività gli ambienti più ricercati. I solidi piani in Marmo, splendenti e lucidi, sono trattati per ridurne la porosità, tuttavia si consiglia pulizia costante e cura nell'utilizzo del prodotto.

Tag is a coffee table suitable for waiting areas, made with a minimal design metal frame. The Porcelain stoneware tops stand out for their excellent technical performance, ideal for the most delicate uses where maximum hygiene and resistance must be guaranteed. Porcelain tops are compatible with foodstuffs, resistant to fungi and molds, suitable for both indoor and outdoor use, resistant to frost, heat and high temperatures, they can be cleaned very easily while maintaining the characteristics of the surface.

Tag è un tavolino adatto ad aree attesa, realizzato con una struttura metallica dal design minimale.

I piani in Gres Porcellanato si distinguono per le eccellenti performance tecniche, ideali negli impieghi più delicati nei quali è necessario garantire la massima igiene e resistenza. I piani Porcelain sono compatibili con le sostanze alimentari, resistenti a funghi e muffe, idonei ad un utilizzo sia interno che esterno, resistenti al gelo, al calore e alle alte temperature, si possono pulire con estrema facilità mantenendo inalterate le caratteristiche della superficie.

# Minush

Studio Eurolinea Design

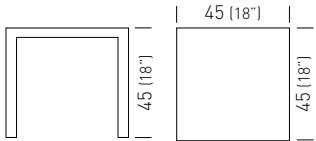

The Minush stackable coffee table, made of technopolymer, takes up the lines of some collections of Gaber chairs and sunbeds, but suit perfectly any outdoor seat as a practical support for small objects.

Il tavolino impilabile Minush, realizzato in tecnopoliimero, riprende le linee di alcune collezioni di sedute e lettini Gaber, ma ben si adatta ad accompagnare qualunque seduta da esterno come pratico appoggio per piccoli oggetti.

Technopolymer Frame Color / Colore Struttura Tecnopoliimero

# Aprio

Forsix Design

Aprio is an extendable rectangular garden table, with an epoxy powder coated aluminum frame and compact laminate top. Thanks to the construction materials and the telescopic extending frame, integrated with the legs, the table lends itself perfectly to both indoor and outdoor use. The patented extension system allows the structure to slide, keeping the legs always at the ends of the table. A quick coupling system allows easy extension by inserting one or two of the leaves that are hidden within the frame itself.

Aprio è un tavolo da giardino rettangolare allungabile, con struttura in alluminio verniciato a polveri epossidiche e piano in Compactop. Grazie ai materiali di costruzione e alla struttura telescopica di allungo, solidale con la gamba, il tavolo si presta perfettamente all'utilizzo sia indoor che outdoor. Il sistema brevettato di allungo consente lo scorrimento della struttura, mantenendo le gambe sempre alle estremità del tavolo. E' possibile scegliere di allungare il tavolo aggiungendo con facilità una o due prolunghe, completamente nascoste all'interno della struttura, grazie ad un sistema di aggancio rapido.

## ABOUT COMPACTOP: MUCH MORE THAN A MERE SURFACE

Gaber Compactops are made of high-pressure laminate, consisting of numerous layers of paper saturated with thermosetting resins and bonded through the combined action of heat and high pressure. The paper used on Compactop (around 70% of the complete composition) comes from production processes that conform with the FSC chain of custody; phenolic and melamine resins are all strictly water-based.

The result is a stable, non-reactive, homogenous, non-porous, antistatic, high-density product with a totally distinct physical and chemical profile from that of its constituent parts. Thanks to the heat and high-pressure treatment it they undergo, Gaber Compactops are exceptionally tough and resistant to scratches, abrasions, chemicals and heat, making them ideal for a wide range of contract applications. Tops come pre-bored for Gaber kit bases.

Gaber Compactops conform to EN 438/1. According to this norm, the most important characteristics of Gaber Compactops are: their resistance to bumps, scratches, and wear and tear; colorfastness; easy cleanability; suitable for contact with food and general hygiene.

UNI EN 438 is the reference standard for Compactop Gaber tops. This standard prescribes tolerances in the flatness of the product and on possible stains and other similar surface defects, for which the admissible size is based on a maximum contamination area equivalent to  $1\text{mm}^2/\text{m}^2$  of laminate, concentrated in a single point or distributed in more points, proportional to the size of the sheet under inspection.

## MAINTENANCE & CLEANING

No specific maintenance other than normal cleaning is required. The compact, non porous surface can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.

## CHE COS'È IL COMPACTOP? MOLTO PIÙ DI UNA SEMPLICE SUPERFICIE

Il Compactop che Gaber utilizza per i propri tavoli è un laminato realizzato ad alta pressione, costituito da numerosi strati di carta impregnati con resine termoindurenti fenoliche e melaminiche, compattati attraverso l'azione combinata di calore ed alta pressione. Le carte utilizzate (circa il 70% della composizione dei piani) derivano da processi che seguono il protocollo della catena di custodia certificata FSC; le resine fenoliche e melaminiche sono tutte rigorosamente realizzate su base acquosa.

Il risultato è un prodotto stabile, non reattivo, omogeneo, non poroso, antistatico e di alta densità. Grazie al trattamento di alta temperatura e pressione cui è sottoposto, il Compactop è un materiale estremamente robusto: resistente a graffi, urti, abrasioni, sostanze chimiche e calore; caratteristiche che lo rendono il materiale ideale per una vasta gamma di applicazioni. I fissaggi dei piani Compactop sono già predisposti per i basamenti Gaber.

Il Compactop è conforme alla norma EN 438/1, secondo la quale, queste sono le principali caratteristiche di qualità di questo materiale: Resistente all'impatto, ai graffi e all'usura, stabile alla luce, facile da pulire, igienico, adatto al contatto con i cibi.

La UNI EN 438 è la norma di riferimento dei piani in Compactop Gaber. Tale normativa prescrive tolleranze nella planarità del prodotto e su possibili macchie e altri difetti superficiali simili, per i quali la dimensione ammissibile è basata su un'area di contaminazione massima equivalente a  $1\text{mm}^2/\text{m}^2$  di laminate, concentrata in un unico punto o dispersa in più punti, proporzionale alla dimensione del foglio sottoposto a ispezione.

## MANUTENZIONE E PULIZIA

Il Compactop non richiede alcuna manutenzione particolare al di là della normale pulizia.

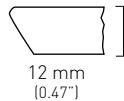

La sua superficie compatta e non porosa può essere facilmente pulita e disinfeccata con acqua calda, vapore e tutti i tipi dei più comuni detergenti e disinfettanti per uso domestico, purché non alcalini. Sono necessarie solo poche precauzioni, quali l'evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti fortemente abrasivi.

### MAINTENANCE & CLEANING

No specific maintenance other than normal cleaning is required. The compact, non porous surface can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.

### CHE COS'È IL COMPACTOP? MOLTO PIÙ DI UNA SEMPLICE SUPERFICIE

Il Compactop che Gaber utilizza per i propri tavoli è un laminato realizzato ad alta pressione, costituito da numerosi strati di carta impregnati con resine termoindurenti fenoliche e melaminiche, compattati attraverso l'azione combinata di calore ed alta pressione. Le carte utilizzate (circa il 70% della composizione dei piani) derivano da processi che seguono il protocollo della catena di custodia certificata FSC, le resine fenoliche e melaminiche sono tutte rigorosamente realizzate su base acquosa.

Il risultato è un prodotto stabile, non reattivo, omogeneo, non poroso, antistatico e di alta densità. Grazie al trattamento di alta temperatura e pressione cui è sottoposto, il Compactop è un materiale estremamente robusto: resistente a graffi, urti, abrasioni, sostanze chimiche e calore; caratteristiche che lo rendono il materiale ideale per una vasta gamma di applicazioni. I fissaggi dei piani Compactop sono già predisposti per i basamenti Gaber.

Il Compactop è conforme alla norma EN 438/1, secondo la quale, queste sono le principali caratteristiche di qualità di questo materiale: Resistente all'impatto, ai graffi e all'usura, stabile alla luce, facile da pulire, igienico, adatto al contatto con i cibi.

La UNI EN 438 è la norma di riferimento dei piani in Compactop Gaber. Tale normativa prescrive tolleranze nella planarità del prodotto e su possibili macchie e altri difetti superficiali simili, per i quali la dimensione ammissibile è basata su un'area di contaminazione massima equivalente a  $1\text{mm}^2/\text{m}^2$  di laminato, concentrata in un unico punto o dispersa in più punti, proporzionale alla dimensione del foglio sottoposto a ispezione.

### MANUTENZIONE E PULIZIA

Il Compactop non richiede alcuna manutenzione particolare al di là della normale pulizia.

La sua superficie compatta e non porosa può essere facilmente pulita e disinfeccata con acqua calda, vapore e tutti i tipi dei più comuni detergenti e disinfeccanti per uso domestico, purché non alcalini. Sono necessarie solo poche precauzioni, quali evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti fortemente abrasivi.

#### ABOUT COMPACTOP: MUCH MORE THAN A MERE SURFACE

Gaber Compactops are made of high-pressure laminate, consisting of numerous layers of paper saturated with thermosetting resins and bonded through the combined action of heat and high pressure. The paper used on Compactop (around 70% of the complete composition) comes from production processes that conform with the FSC chain of custody; phenolic and melamine resins are all strictly water-based. The result is a stable, non-reactive, homogenous, non-porous, antistatic, high-density product with a totally distinct physical and chemical profile from that of its constituent parts. Thanks to the heat and high-pressure treatment it they undergo, Gaber Compactops are exceptionally tough and resistant to scratches, abrasions, chemicals and heat, making them ideal for a wide range of contract applications. Tops come pre-bored for Gaber kit bases. Gaber Compactops conform to EN 438/1. According to this norm, the most important characteristics of Gaber Compactops are: their resistance to bumps, scratches, and wear and tear; color-fastness; easy cleanability; suitable for contact with food and general hygiene. UNI EN 438 is the reference standard for Compactop Gaber tops. This standard prescribes tolerances in the flatness of the product and on possible stains and other similar surface defects, for which the admissible size is based on a maximum contamination area equivalent to 1mm² / m² of laminate, concentrated in a single point or distributed in more points, proportional to the size of the sheet under inspection.

#### MAINTENANCE & CLEANING

No specific maintenance other than normal cleaning is required. The compact, non porous surface can easily be cleaned and disinfected with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.

### ABOUT FENIX COMPACTOP

Gaber's Fenix Compactop differ from standards as they are built with new generation materials on exposed coated surfaces, made using nanoparticles and acrylic resins. This coating avoid fingerprints on the material, make it soft-touch, heat-repairing, opaque and extremely resistant to bumps and scratches. In addition to this, the material is water repellent, hygienic, easy to clean and suitable for food-contact.

### MAINTENANCE & CLEANING

No specific maintenance other than normal cleaning is required. The compact, non porous surface can easily be cleaned and disinfected with a soft cloth dampened with hot water, steam and any common non-abrasive household detergents and disinfectants, as long as these are not highly alkaline. Just a couple of precautions are necessary: avoid using strong acids and bases and avoid wiping with highly abrasive substances or equipment.

### CHE COS'E' IL FENIX COMPACTOP

I piani Compactop Fenix di Gaber differiscono dagli standard in quanto prevedono l'utilizzo delle superfici esposte rivestite con materiali di nuova generazione, realizzati per mezzo dell'uso di nanoparticelle e resine acriliche. Tali rivestimenti rendono il materiale anti-impronta, morbido al tatto, termo-riparatore, opaco ed estremamente resistente ad urti e graffi. Oltre a ciò, il materiale è idrorepellente, igienico, resistente alle muffe, facile da pulire e adatto al contatto con alimenti.

### MANUTENZIONE E PULIZIA

Il Compactop non richiede alcuna manutenzione particolare al di là della normale pulizia.

La sua superficie compatta e non porosa può essere facilmente pulita e disinfeccata con un panno umido, acqua calda, vapore e tutti i tipi dei più comuni detergenti e disinfettanti per uso domestico, purché non alcalini. Sono necessarie solo poche precauzioni, quali l'evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti fortemente abrasivi.

### ABOUT LAMINATED TABLE TOPS

Gaber's laminate table tops are composed of a high-pressure decorative laminate layer, with a recycled-wood chipboard core and ABS edging. Gaber's support materials are E1 according to tests stipulated by the European standards EN717 and EN120 regarding formaldehyde emission. Laminate tops come ready for Gaber kit bases.

The result is homogeneous, static, lightweight and highly customizable in terms of shapes and finishes.

Our laminate tops are manufactured according to the following European Standards related to fire reaction: EN 13501-1:2009 B -s2, d0.

### MAINTENANCE & CLEANING

Gaber laminated table tops do not require any special maintenance beyond normal cleaning.

Laminated surfaces can be easily cleaned with a soft cloth dampened with water, even with cleaning agents, but not alkaline and generally aggressive. Avoid the use of strong acids or bases, avoid wiping with abrasive substances or equipment.

### COSA SONO I PIANI DEI TAVOLI IN LAMINATO?

I ripiani laminati che Gaber utilizza per i propri tavoli sono composti da uno strato di laminato decorativo ad alta pressione, supportato da un pannello di truciolare; quest'ultimo realizzato con i materiali di scarto delle normali lavorazioni del legno. I piani sono bordati con bordo in Abs. La tipologia di supporto utilizzato da Gaber per i propri piani è di classe E1 secondo i test espressi dalle normative europee EN717 e EN120 in materia di emissione di formaldeide. I fissaggi dei ripiani in Laminato sono già predisposti per i basamenti Gaber.

Il risultato è un prodotto omogeneo, antistatico, leggero e facilmente personalizzabile in forme e finiture.

I nostri piani in laminato sono realizzati secondo la normativa europea di reazione al fuoco EN 13501-1:2009 B -s2, d0.

### MANUTENZIONE E PULIZIA

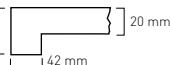

I piani Laminati di Gaber non richiedono alcuna manutenzione particolare al di là della normale pulizia.

La sua superficie può essere facilmente pulita con un panno morbido imbevuto di acqua, anche con detergenti per uso domestico, purché non alcalini ed in genere aggressivi. Evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti abrasivi.

## ABOUT IRON TABLE TOPS

Gaber's Iron table tops are made of composite materials: a non-deformable water-repellent multilayer wood-based core, covered in steel. The slim line result is elegant, stylish and practical. Iron tops come with metal inserts for Gaber Kit bases. These tough materials make iron tops suitable for indoor as well as outdoor use.

## MAINTENANCE & CLEANING

Gaber's Iron table tops do not require any special maintenance beyond normal cleaning. Its surface can be easily cleaned with a soft cloth dampened with water, even with household cleaning detergent, provided they are not alkaline and generally aggressive. Avoid the use of strong acids or bases, avoid rubbing with abrasive substances or devices.

## COSA SONO I PIANI DEI TAVOLI IRON?

I sistemi Iron che Gaber utilizza per i propri piani dei tavoli sono realizzati da materiali compositi: il cuore del sistema è realizzato con un materiale multistrato, a base legnosa, resistente all'umidità, di grande stabilità. Il rivestimento in acciaio e lo spessore contenuto rendono il prodotto elegante, raffinato e pratico. I fissaggi dei piani Iron sono già predisposti per i basamenti Gaber. Le finiture disponibili lo rendono adatto anche all'uso per outdoor, grazie all'ottimale resistenza agli agenti atmosferici.

## MANUTENZIONE E PULIZIA

I piani Iron di Gaber non richiedono alcuna manutenzione particolare al di là della normale pulizia. La sua superficie può essere facilmente pulita con un panno morbido imbevuto di acqua, anche con detergenti per uso domestico, purché non alcalini ed in genere aggressivi. Evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti abrasivi.

## ABOUT STEEL SLIM TABLE TOPS

Gaber's Steel Slim table tops are made of composite materials: a non-deformable waterproof techno-polymer core, covered by an epoxy painted sheet of steel treated for outdoor purpose. The slim line result is elegant, stylish and practical. These tough materials make Steel Slim tops suitable for indoor as well as outdoor use. Steel Slim tops come with metal inserts for Gaber kit bases.

## MAINTENANCE & CLEANING

Gaber's Steel Slim table tops do not require any special maintenance beyond normal cleaning. Its surface can be easily cleaned with a soft cloth dampened with water, even with household cleaning detergent, provided they are not alkaline and generally aggressive. Avoid the use of strong acids or bases, avoid rubbing with abrasive substances or devices.

## COSA SONO I PIANI DEI TAVOLI STEEL SLIM?

La tecnologia Steel Slim che Gaber utilizza per i propri piani dei tavoli è realizzata per mezzo di materiali compositi: il cuore del sistema è realizzato con un materiale polimerico, di grande stabilità ed impermeabile, rivestito da una lamiera di acciaio verniciata a polveri epossidiche trattata per l'utilizzo per esterni. Il rivestimento in acciaio e lo spessore contenuto rendono il prodotto elegante, raffinato e pratico. Le finiture disponibili rendono tali piani tavoli adatti anche all'uso outdoor, grazie all'ottimale resistenza agli agenti atmosferici. I piani tavoli Steel Slim sono dotati di inserti metallici predisposti per i basamenti Gaber.

## MANUTENZIONE E PULIZIA

I piani tavoli Steel Slim di Gaber non richiedono alcuna manutenzione particolare al di là della normale pulizia. La loro superficie può essere facilmente pulita con un panno morbido imbevuto di acqua, anche con detergenti per uso domestico, purché non alcalini ed in genere aggressivi. Evitare l'uso di acidi o basi forti, evitare di strofinare con sostanze o strumenti abrasivi.

## ABOUT TECHNO POLYMER TABLE-TOPS

The Techno Polymer Compounds Gaber uses on its table tops have high structural, heat and abrasion resistance. Gaber's technopolymer table tops are practical, shock-resistant, colorful and inexpensive.

Gaber technopolymers are non-toxic, stain-resistant, antistatic and UV-resistant and consequently have excellent resistance to atmospheric agents. All these materials are recyclable in the full respect of our Natural Environment. Gaber produces plastic injected materials without added chemicals and, as far as possible, recycled pre-used technopolymers are sourced as a base raw material. Technopolymer table top colors perfectly match the colors of Gaber's seating collection.

## MAINTENANCE & CLEANING

The plastic surfaces of Gaber products can generally be cleaned with a cloth and warm water. For the most persistent stains, a small amount of liquid soap diluted in water may be used. Do not use acetone, trichloroethylene, ammonia, alcoholic substances and detergents that contain even just a small amount of these substances. We also recommend avoiding all types of abrasive and solvent substances or rough sponges.

## COME SONO FATTI I RIPIANI IN TECNOPOLIMERO?

I piani in Tecnopoliomeri utilizzati da Gaber per i propri tavoli sono realizzati per mezzo del processo di iniezione plastica. I piani così realizzati sono pratici, resistenti agli urti, colorati ed economici. I compound di tecnopoliomeri utilizzati da Gaber nella realizzazione dei propri prodotti sono caratterizzati da un'elevata resistenza strutturale, termica e all'abrasione. Il tecnopoliomerio è atossico, antimacchia, antistatico e anti-uv: qualità che lo rendono ottimamente resistente agli agenti atmosferici. I tecnopoliomeri utilizzati da Gaber sono integralmente riciclabili, nel pieno rispetto del nostro Ambiente Naturale. Gaber produce articoli termoplastici senza additivi chimici e, ove possibile, vengono utilizzati tecnopoliomeri riciclati derivanti da post-consumo. I colori dei ripiani dei tavoli corrispondono ai colori della vasta collezione di sedute Gaber.

## MANUTENZIONE E PULIZIA

Le superfici in tecnopolimero dei piani dei tavoli Gaber possono essere pulite con un panno umido e soffice imbevuto in acqua. Per le macchie più ostinate è possibile diluire in acqua del sapone neutro liquido con moderazione. Non utilizzare acetone, trielina, ammoniaca, sostanze alcoliche o detersivi che contengano anche piccole quantità di tali detergenti. Non utilizzare a contatto con il prodotto sostanze abrasive o solventi, strumenti di pulizia ruvidi.

# **TABLES BASES COLLECTION**

The maximum recommended dimensions of the table tops in the following chapter refer to the Gaber table tops.

Le dimensioni massime consigliate dei piani tavoli presenti nel seguente capitolo si riferiscono ai piani tavoli Gaber.

# LOL PLUS

The Lol Plus table bases collection is made of steel, the cross is made in die cast aluminum, and provided with flip-top joint. The shape of the base and the flip-top mechanism allow the table to easily fold and stack, space-saving. The available colour palette is common to many Gaber seating collections, guaranteeing tone-on-tone colour co-ordination throughout designed settings rather than lively contrasts, defining various colour combinations between bases, tops and seating.

La Collezione di basamenti Lol Plus è realizzata in acciaio, la crociera è realizzata in presso fusione di alluminio, ed è dotata di giunto per la rotazione del piano. La forma della base e la meccanica che permette la rotazione del piano in posizione verticale, rendono il tavolo facilmente accatastabile in spazi ridotti. La palette di colori disponibile è comune a molte collezioni di sedute Gaber, garantendo abbinamenti tono su tono degli ambienti progettati, piuttosto che vivaci contrasti, definendo diverse combinazioni di colori tra basi, piani e sedute.

# **OFFICE AND WORKSPACE SYSTEMS**

# Workstation 2027

Forsix Design

This office furniture collection is intended for modern workplaces. It is distinguished by simple and rational worktop lines as well as slender and resistant support frames with a trestle shape. The service cabinets are suspended, a feature designed for easy and modern cleaning. The desks can be equipped with high-performance sound-absorbing screens, to improve privacy and the general acoustics of the workplace. The assembly systems have been especially designed to be fast and safe. The products are made with panels having Euroclass reaction to fire B-s1, d0 - Bfl - s1 according to EN 13501-1; Class E1 according to EN 120 regarding the release of Formaldehyde.

Programma d'arredo destinato ad uffici moderni con piani di lavoro dalle linee semplici e razionali, strutture di sostegno con forma a cavalletto per essere snelle e resistenti. I mobili di servizio sono sospesi, caratteristica pensata per una semplice e moderna pulizia automatica. Le scrivanie possono essere dotate di schermi divisorii per migliorare la privacy e l'acustica. I sistemi di assemblaggio sono veloci e sicuri. I prodotti sono realizzati con pannelli aventi Euroclasse di reazione al fuoco B-s1, d0 – Bfl – s1 secondo la EN 13501-1, inoltre Classe E1 secondo la EN 120 in merito al rilascio di Formaldeide.

# Display

Kristine Flensted Nielsen Design

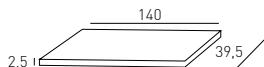

Frame colors / Colori struttura

Fenix laminated top color / Colori piano laminato Fenix

Laminated shelve "Display".  
Mensola in laminato "Display"

Display wall or floor fixed storage shelving can enhance your most ambitious projects. Available with a black, gold or white matt painted steel frame, without any visible welds, Display is set off with solid Fenix laminate shelves. Display is a modular piece, which can support up to 4 shelves and lends itself to completing and finely decorating walls and corners of your commercial spaces.

For correct use, the structure must be fixed to the wall or floor.

Semplice ed elegante, Display decorerà con discrezione i vostri progetti più ambiziosi. Disponibile con struttura in acciaio verniciato nero, oro o bianco opaco, senza nessuna saldatura a vista, è impreziosito da solidi ripiani in laminato Fenix. Display è un elemento modulare, che può sostenere sino a 4 mensole e si presta a completare e decorare con raffinatezza pareti ed angoli dei vostri spazi commerciali. Per un corretto utilizzo, questo mobile deve essere fissato alla parete o pavimento.

### Display example of use

# Caddy Display Container

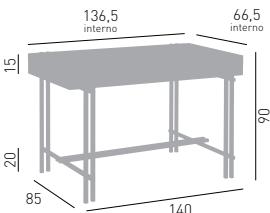

Kristine Flensted Nielsen Design

Frame Color / Colore Struttura

10

This high quality metal multipurpose storage container beautifully displays all the materials you need. Its main features are its sturdy steel matt black lacquered tray and its frame with a linear shape, able to add value to your spaces, keeping all necessary materials tidily in place.

Questo contenitore multifunzione in metallo di alta qualità funge da vano portaoggetti ed espone splendidamente tutti i materiali di cui hai bisogno.

Le sue caratteristiche principali sono la robusta struttura in metallo verniciata nero opaco e il telaio dalla forma lineare, in grado di valorizzare gli spazi e mantenere in ordine i materiali da esporre.

# Culture

Malene Flensted Urup Design

Frame Color / Colore Struttura

10

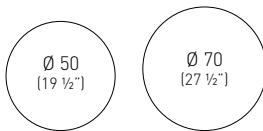

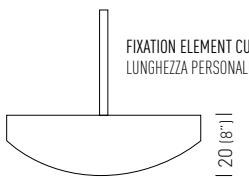

The Culture hanging planters, designed by Malene Flensted Urup, are an interesting system to bring what normally attracts the outdoors in, into workplace and hospitality settings. The Culture system easily creates oases of calm with a minimalist look: practical and good looking, simplifying the cleanliness and order of the most contemporary environments.

Available in two sizes, these planters have been created to be fixed to the ceiling, thus creating vertical gardens even in limited spaces areas.

Le fioriere pensili Culture, disegnate da Malene Flensted Urup, sono un'interessante sistema per portare ciò che normalmente richiama l'outdoor all'interno, in stanze dedicate all'ambiente di lavoro e all'ospitalità.

Il sistema Culture crea facilmente delle oasi di calma dal look minimalista: pratiche e piacevoli alla vista, semplificano la pulizia e l'ordine degli ambienti più contemporanei.

Disponibili in due dimensioni, le fioriere sono state create per essere fissate al soffitto e creare quindi giardini verticali anche in aree dove lo spazio è limitato.

## GABER® LITERATURE

All Gaber literature contains technical information and use-suggestions for those who intend to purchase or already have bought items from the Gaber range. For Customers' interest, the Company may modify its products without any prior notice. Drawings, quote, sizes, materials, colors represented in Gaber Literature are shown as a guide only and subject to tolerances. The colors displayed in Gaber literature or palettes, including physical ones, related to techno-polymer finishing, fabrics, leather, lacquered or painted materials, wooden items, laminated and compactop materials, glass, marble and porcelains, may change from time to time: Gaber declines all responsibility in relation to slight differences in shades. Gaber reserves the right to suspend the production of any of its products without any notice or reason. Gaber is a registered trademark: all inherent rights and all rights of reproduction in whole or in part of Gaber literature, related to text, images or illustration, or transmitted by any means, electronic or mechanical, including photocopying, recording or any information storage without written permission from Gaber, are worldwide reserved.

## MAINTENANCE

Correct and frequent maintenance and cleaning increases the lifespan of the products: follow the specific guidelines to each product for cleaning, sanitizing and maintenance advice. Any maintenance interventions must be carried out by expert personnel.

## MATERIALS

### Plastic Materials

The Technopolymer compounds Gaber uses on its products are characterized by high structural resistance, heat and abrasion resistance. Gaber techno-polymers are non-toxic, stain resistant, antistatic, waterproof and UV-resistant: thanks to all these features these materials have excellent resistance to atmospheric agents. All these materials are recyclable in the full respect of our Natural Environment. Gaber produces plastic injected materials without added chemicals and, as far as possible, recycled techno-polymers are sourced as a base raw material, recovered post-consumption. Even products made especially for outdoor purposes could be affected by atmospheric agents: products may undergo exterior changes due to particular exposure to heat, sunlight, humidity and salinity. Gaber glides and floor-pads are made of blended rubber for heavy-duty use and are designed to minimise noise. Certain Gaber items come ready-fitted with felt floor-pads, specifically for hard or especially delicate floors. Some techno-polymer materials can show small defects such as shadows or streaks due to the structural characteristic of the material itself. Gaber manufactures some products of its collection with fire retardant techno-polymer: the additives that make the fireproof plastic can substantially change the aesthetics and durability of the product.

### Steel

High-resistance steel is used to produce frames for chairs, stools and tables by using square or round tubes as well as solid rod. Products are available in chrome or painted finishes. The galvanic treatments and special epoxy powder coating used on many Gaber structures achieves excellent resistance to atmospheric agents.

### Aluminum

Gaber use aluminum to produce frames for chairs, stools and tables. Aluminum surfaces can be anodized, and Gaber use this special treatment in order to increase resistance to corrosion.

### Wood

Our wooden products are produced in accordance with the European Regulations in force regarding formaldehyde emissions from wood-based products. "Compound-wood" is a material used by Gaber for the production of some specific collections: this material uses wood fibers coming from the same production processes with which Gaber makes wooden components. Wooden products, being natural materials, can be damaged easily. Small impurities or imperfections are within quality standard range. Wooden surfaces cannot withstand direct heat sources.

### Flexible Polyurethane Padding

The flexible polyurethane cold-pressed paddings Gaber uses on some of its upholstered products do not contain CFC/HCFC (ODP=0: do not contribute the reduction of the atmospheric ozone layer), they are fire-retardant class 1-IM UNI 9175 / CMHR following European Standards.

### Coverings: Fabrics and Leathers

Gaber uses fabrics and leathers that belong to a wide range of colors and patterns, which are all tested in order to achieve the best performance, among which resistance to abrasion and artificial light. Fire-retardant fabrics and eco-leather upholstery are also available.

## PACKAGING AND RECYCLING

Packages are designed to optimize storage and transport requirements, they are made of 90% recycled raw material and are completely recyclable in themselves. The optimization of packaging in terms of volume and weight delivers a lower consumption of energy in many forms, helping the environment and a consequent saving on transport costs. In order to avoid the loss of components, packaging must be disposed only after completing the assembly of the products. Once the product has been dismantled, the product itself or its components must be given to public garbage system, according to local rules, following the specific end of life disassembly sheets.

## INNAPPROPRIATE USES OF THE PRODUCT

Avoid any improper use of the product; do not step on the product, do not stand on footrest or on armrests, do not seat on the back or on armrest, do not use the chair as a ladder. The product should not be subjected to swinging back and forwards that may damage the furniture or result in injury to the user. When lifting or moving the product, hold it by the main structure and not just under the seat. Gaber will accept no liability for any damages caused to property or persons subsequent to incorrect or improper handling of the product. Gaber also declines any responsibility in cases of damage caused to delicate floors.

## DOCUMENTAZIONE GABER®

La documentazione Gaber contiene informazioni tecniche e consigli d'uso per chi vuole acquistare o possiede articoli della gamma prodotti Gaber. Nell'interesse della clientela Gaber si riserva il diritto di modificare i propri modelli in ogni momento, senza obbligo di preavviso. I disegni, le quote e le dimensioni, i materiali ed i colori rappresentati nella documentazione Gaber si intendono a titolo puramente indicativo, e soggetti a tolleranze. I toni di colore rappresentati o presenti nelle palette Gaber, anche fisiche, relativi a polimeri, rivestimenti di ogni genere, verniciature, laccature, laminati e compactop, vetri, essenze legno, marmi e porcellane, sono indicativi, in quanto passibili di variazioni da partita a partita: Gaber declina ogni responsabilità in relazione a leggere differenze di tonalità. Gaber si riserva inoltre il diritto di ritirare, sospendere o cessare la produzione di ogni suo prodotto o versione in qualsiasi momento e a sua discrezione senza darne preventivo avviso. Gaber è un marchio registrato: tutti i diritti ad esso inerenti o di riproduzione, anche parziale, di cataloghi e listini Gaber relativi a testi, immagini, illustrazioni, disegni, sia con mezzi meccanici che elettronici, incluso fotocopie o la formazione di sorgenti di informazione, senza il preventivo permesso scritto di Gaber, sono globalmente riservati.

## MANUTENZIONE

Una corretta e frequente manutenzione e pulizia aumenta la durata di vita dei prodotti: consultare le guide specifiche ad ogni prodotto per i consigli di pulizia, sanificazione e manutenzione. Eventuali interventi di manutenzione devono essere eseguiti da personale esperto.

## MATERIALI

### Materie Plastiche

I compound di tecnopolimeri utilizzati da Gaber nella realizzazione dei propri prodotti sono caratterizzati da un'elevata resistenza strutturale, termica e all'abrasione. Il tecnopolimero componente dei prodotti Gaber è atossico, antimacchia, antistatico, impermeabile e anti-uv: qualità che lo rendono ottimamente resistente agli agenti atmosferici. I tecnopolimeri utilizzati da Gaber sono integralmente riciclabili, nel pieno rispetto del nostro ambiente naturale. Gaber produce articoli termoplastici senza additivi chimici e, ove possibile, vengono utilizzati tecnopolimeri riciclati derivanti da post-consumo industriale. I prodotti destinati all'uso esterno subiscono comunque nel tempo l'azione degli agenti atmosferici: eventuali alterazioni superficiali possono verificarsi a specifiche condizioni di temperatura, raggi solari, umidità e salinità. I tappi e le protezioni dei prodotti Gaber sono realizzati in una mescola di gomma ad alta resistenza all'usura, atta a diminuire il rumore da fruscinamento. Alcuni prodotti Gaber sono dotati di tappi con filtri, adatti a pavimenti rigidi e più delicati. Alcuni materiali in tecnopolimero possono evidenziare piccoli difetti come ombre o striature dovute alla caratteristica strutturale del materiale stesso. Gaber realizza alcuni prodotti della propria collezione con tecnopolimeri ignifugi: gli additivi che rendono il manufatto plastico ignifugo possono variare sostanzialmente l'estetica e la resistenza del prodotto.

### Acciaio

L'acciaio ad alta resistenza è utilizzato nelle strutture di tavoli, sedie e sgabelli, realizzati da Gaber per mezzo di tubolari a sezione quadrata e rotonda, o con fondino. I prodotti sono disponibili con finitura cromata o verniciata. I trattamenti galvanici e la speciale verniciatura a polveri epossidiche utilizzata da Gaber per alcune strutture dei propri prodotti raggiunge una resistenza ottimale agli agenti atmosferici.

### Alluminio

Gaber utilizza l'alluminio per realizzare le strutture di tavoli, sedie e sgabelli. La finitura per mezzo del trattamento superficiale di anodizzazione, utilizzata in alcuni prodotti, ha lo scopo di aumentarne la resistenza alla corrosione.

### Legno

I prodotti Gaber con elementi in legno sono prodotti di accordo con le vigenti normative Europee rispetto alle emissioni di formaldeide. "Compound-wood" è il particolare materiale utilizzato da Gaber per la realizzazione di alcune collezioni: questo materiale utilizza fibre di legno derivanti dagli stessi processi di produzione con cui Gaber realizza elementi in materiale legnoso. Le superfici in legno, essendo un materiale naturale, potrebbero, nel tempo, subire alterazioni di colore con l'utilizzo e con l'esposizione alla luce. Inoltre, per loro natura, tali superfici sono facilmente danneggiabili; alcune piccole impurità ed imperfezioni rientrano negli standard di qualità accettati. Le superfici in legno non possono sopportare fonti di calore dirette.

### Imbottiture in Poliuretano Flessibile

Le imbottiture di alcuni prodotti Gaber sono realizzate in poliuretano flessibile, stampato a freddo, privo di CFC/HCFC (ODP=0 : non contribuisce alla riduzione dello strato di ozono atmosferico), autoestinguente classe 1-IM Uni 9175 / CMHR, seguendo le normative Europee in materia.

### Rivestimenti: tessuti e pelli

Tessuti e Pelli utilizzati da Gaber appartengono ad un'ampia gamma di colori e trame, tutti scelti tra un range di prodotti testati con l'obiettivo di ottenere le migliori caratteristiche prestazionali, quali la resistenza all'abrasione, allo sfregamento e alla resistenza alla luce artificiale. Sono disponibili categorie di tessuti ignifugi e rivestimenti in finte pelli.

## IMBALLI E RICICLO

Gli imballi sono realizzati con l'obbiettivo di ottimizzare trasporti e stoccaggio: sono realizzati per il 90% di materiali riciclati e totalmente riciclabili. L'ottimizzazione dell'imballo in termini di volume e peso comporta un minore dispiego di energia, con un conseguente risparmio nei costi di trasporto e un importante aiuto alla salvaguardia del nostro ambiente. È consigliabile lo smaltimento degli imballi solo a completamento dell'assemblaggio, onde evitare lo smarrimento di eventuale ferramenta e componenti. Una volta dismesso, il prodotto o i suoi componenti, vanno conferiti ai sistemi pubblici di smaltimento secondo quanto previsto dalla legislazione locale in vigore, seguendo le specifiche schede di smontaggio a fine vita.

## USO IMPROPRI DEI PRODOTTI

Sono da considerarsi usi impropri e/o scorretti del prodotto il salire in piedi su tavoli, sedie, sgabelli, poggiapiedi, sedersi su schienali, braccioli, utilizzare i prodotti come scaletta. Evitare oscillazioni che potrebbero pregiudicare il funzionamento e la sicurezza dell'utente. Per sollevare o spostare un prodotto non afferrare sotto il sedile, bensì afferrare saldamente la struttura portante. Il prodotto non deve essere sottoposto a carichi decentrati, è stato progettato per essere utilizzato in condizioni normali di appoggio (su quattro gambe o sulla base). Gaber declina ogni responsabilità per danni causati a cose o a persone derivanti da uso non corretto del prodotto; l'azienda inoltre si solleva da ogni responsabilità per danni provocati su pavimenti e superfici delicate.

## DOCUMENTACION GABER®

Toda la documentación Gaber contiene una serie de informaciones técnicas y consejos para el utilizar para quién quiera comprar o para quién posea productos pertenecientes a la gama Gaber. En el interés de los clientes, Gaber se reserva el derecho de poder modificar o mejorar sus productos sin avisar antes. Los dibujos, las cuotas y las medidas, los materiales y los colores se ilustran exclusivamente a modo de ejemplo y son indicativos, sujetos a tolerancias. Las tonalidad de los colores de los muestrario, también físico, relativos a los polímero, las telas, pieles, pinturas, esencias de las maderas, laminados y compactop, mármol y porcelana, pueden variar según partida: Gaber declina todo tipo de responsabilidades con relación a pequeñas diferencias de color. Gaber se reserva además el derecho de retirar, suspender o cesar la producción de cualquier producto en cualquier momento y a propia discreción sin dar previo aviso. Gaber es una marca registrada y todos los derechos que hacen referencia a ella y los derechos de reproducción, incluso parcial, de los catálogos y listas de precios Gaber relativos a los textos, imágenes, ilustraciones, diseños ya sea por medios mecánicos o electrónicos, incluyendo el fotocopiado o la formación de fuentes de información, sin el permiso previo por escrito de Gaber, son reservados a nivel mundial.

## MANTENIMIENTO

Una correcta y frecuente limpieza y mantenimiento aumenta la vida útil de los productos: consulte las guías específicas de cada producto para obtener consejos de limpieza, higienización y mantenimiento. Cualquier intervención de mantenimiento debe ser realizada por personal experto.

## MATERIALES

### Material Plástico

Tecno polímeros compuestos que Gaber utiliza en sus productos se caracterizan por una alta resistencia estructural, al calor y una alta resistencia a la abrasión. Los tecno polímero de Gaber no son tóxicos, son resistentes a manchas, antiestáticos, impermeable y UV-resistente; gracias a esto los materiales tienen una excelente resistencia a los agentes atmosféricos. Todos estos materiales son reciclables en el pleno respeto de nuestro medio ambiente. Gaber produce plástico inyectado sin productos químicos y materiales añadidos y, cuando sea posible, tecnopolímero reciclados se obtienen como materia prima básica, recuperado de post-consumo industrial. Incluso los productos hechos especialmente para el exterior podrían ser afectados por los agentes atmosféricos. Productos podrían someterse a posibles cambios dependientemente en la exposición especial al calor, rayos de sol, la humedad y la salinidad. Los tapones de los productos Gaber están hechos de un compuesto de goma de alta resistencia al desgaste, que reduce el ruido de arrastre. Algunos productos Gaber están equipados con tapones con fieltro, adecuados para suelos duros y más delicados. Algunos materiales de tecnopolímeros pueden presentar pequeños defectos como sombras o rayas debido a las características estructurales del propio material. Gaber fabrica algunos productos de su colección con tecno polímero retardante de fuego: los aditivos que hacen que el producto de plástico sean a prueba de fuego pueden variar sustancialmente la estética y la durabilidad del producto.

### Acero

Acero de alta resistencia se utiliza para producir las estructuras de las sillas y de las mesas, utilizando tubos cuadrados o redondos, así como barilla sólida. Los productos están disponibles en cromo o acabados pintados. Los tratamientos galvánicos y a pintura en polvo epoxi especial, utilizada en muchas estructuras Gaber, logra una excelente resistencia a los agentes atmosféricos.

### Aluminio

Gaber utiliza aluminio, ligero y resistente, para producir estructuras para las sillas y las mesas. Superficies de aluminio pueden ser anodizado, y Gaber utilizan este tratamiento especial con el fin de aumentar la resistencia a la corrosión.

### Las Maderas

Nuestras colecciones de madera se producen de acuerdo con la normativa europea vigente en materia de emisiones de formaldehído de los productos a base de madera. "Compound Wood" es el material particular utilizado por Gaber para la realización de algunas colecciones: este material utiliza fibras de madera derivadas de los mismos procesos de producción con los que Gaber crea elementos en madera. Los productos de madera, siendo materiales naturales, podrían dañarse fácilmente. Las pequeñas impurezas o imperfecciones están dentro del rango estándar de calidad.

### Espumas

Gaber utiliza en algunos de sus artículos tapizados una espuma de poliuretano inyectada dentro de un molde, toda las espumas no contienen CFC/HCFC (ODP = 0: no contribuyen a la reducción de la capa de ozono de la atmósfera), y son de clase ignífugo 1-IM Uni 9175 siguiendo Normas europeas.

### Revestimientos: Telas y Piel

Gaber utiliza telas y pieles que pertenecen a una amplia gama de colores y diseños, que son todos probados a fin de lograr las mejores prestaciones, entre las que la resistencia a la abrasión y la luz artificial. Telas ignífugas y para exteriores, tapicería en eco-piel, también están disponibles.

## EMPAQUE Y RECICLABILIDAD

La gama de productos Gaber está constituida por la mayor parte de elementos completamente reciclables. Nuestros embalajes se escalan con el fin de optimizar los requisitos de almacenamiento y de transporte; están hechos de 90% materia prima reciclada y son totalmente reciclables. La optimización de los embalajes en términos de volumen y peso ofrece un menor consumo de energía en muchas formas, ayudando al medio ambiente y el consiguiente ahorro en los costes de transporte. A fin de evitar la pérdida de componentes, el embalaje debe eliminarse sólo después de completar el montaje de los productos. Una vez que el producto ha sido desmontado, el propio producto o sus componentes se debe dar a un sistema público de reciclaje, de acuerdo con las normas locales, siguiendo las fichas específicas de desmontaje al final de su vida.

## USOS INADECUADO DEL PRODUCTO

Evite cualquier uso inadecuado del producto; no subir/caminar sobre el producto, no se pare en el reposapiés o en los brazos, no sentarse en el espaldar o en el reposabrazos, no utilice la silla como una escalera. El producto no debe ser sometido a pesos desequilibrados, ya que está diseñado para un descanso adecuado en el punto de apoyo (en cuatro patas o en la base). Cuando levante o mueva el producto, manténgalo en la estructura principal y no sólo bajo el asiento. Gaber aceptará ninguna responsabilidad por los daños y perjuicios causados a bienes o personas posteriores a un manejo incorrecto o inadecuado del producto. Gaber se libera de cualquier responsabilidad en caso de daños causados a los suelos delicado o frágiles.

## DOCUMENTATION GABER®

Notre documentation contient des informations techniques et des conseils pour l'utilisation des produits, s'adressant aux clients Gaber ou futurs clients. Dans l'intérêt de la clientèle, Gaber se réserve le droit de modifier ses modèles, à n'importe quel moment, sans aucun préavis. Les dessins, les cotes, les dimensions, les matériaux et les couleurs au sein de la documentation Gaber sont purement indicatifs et soumis à des tolérances. Les tonalités des couleurs de notre palette (papier et physique), relatives aux polipro, aux tissus, aux laques, vernis, mélamines, compact, essences de bois, marbres et porcelaine sont purement indicatives car elles peuvent varier d'un lot à un autre: Gaber décline toute responsabilité en ce qui concerne les différences de tonalité. Gaber se réserve le droit de retirer du catalogue, d'interrompre ou de cesser la production de tout article, sans aucun préavis et à tout moment. Gaber est une marque enregistrée: tout droit inhérent et de reproduction, même partiel, de catalogues et tarifs, relatif aux textes, images, illustrations, dessins, par des moyens mécaniques, électroniques, par photocopie, ou autre source d'information, sans le consentement préalable de Gaber, est globalement réservé.

## ENTRETIEN

Un entretien et un nettoyage, courant et fréquent, augmente la durée de vie du produit: consulter les fiches spécifiques à chaque produit en ce qui concerne les conseils pour l'entretien, le nettoyage, la désinfection. Toute intervention spécifique doit être effectuée par du personnel spécialisé.

## MATERIAUX

### Les matériaux plastique

Les billes de technopolymer utilisées par Gaber pour fabriquer ses produits ont les caractéristiques suivantes: résistance structurel thermique, résistance à l'abrasion, le technopolymer est non toxique, il est anti statique, imperméable et anti UV; ces qualités le rendent très résistant aux agents atmosphériques. Le technopolymer est entièrement recyclable, dans le respect de la charte écologique. Les articles thermoplastique de production Gaber ne contiennent aucun additif chimique et dans la mesure du possible, Gaber utilise des polymères recyclés ou provenant de déchets post-consommation industriel. Les articles utilisés à l'extérieur peuvent être soumis à la longue à l'action d'agents atmosphériques, tels que la salinité, l'humidité, les rayons de soleil, qui peuvent en altérer la surface et la couleur. Les patins des produits Gaber sont faits d'un mélange de caoutchouc à haute résistance d'usure et qui réduit le bruit sur le sol. Certains produits Gaber sont équipés de patins avec feutre, adaptés aux sols plus durs ou délicats. Sur certains produits en polymer, on peut remarquer des petits défauts tels que traces ou tâches plus sombres qui sont dûs simplement aux composants des matériaux. Certains articles de la collection Gaber sont réalisé en polymer non feu ou ignifugé; les additifs qui rendent le produit plastique ignifugé peuvent, cependant en varier l'esthétique et la résistance.

### L'Aacier

L'acier utilisé pour la fabrication des structures de tables, chaises, et tabourets Gaber est très résistant. Il est travaillé sous forme de tube à section carrée ou ronde. La finition peut être chrome ou vernis. Le traitement galvanique et le vernissage spécial à époxy, utilisé par Gaber, résiste de façon optimale aux agents atmosphériques.

### L'Aluminium

Gaber utilise l'aluminium pour la réalisation de structures de tables, chaises et tabourets. La finition anodisée utilisée sur certains produits augmente la résistance à la corrosion.

### Le Bois

Les articles Gaber avec bois, sont fabriqués selon les normes européennes en vigueur, sans formaldehyde (par rapport à l'émission de formaldehyde). Le "compound-wood", matériau utilisé pour la fabrication de certains articles de notre gamme est un mélange de sciure de bois rendu compact et dérivant de matériau recyclé. Le bois étant une matière vivante, il peut, avec le temps et suivant l'exposition à la lumière, subir de légères modifications au niveau de la couleur. Les superficies, de par leur nature, peuvent s'abîmer facilement; nous tenons aussi à préciser que certaines imperfections correspondent à un standard normal de qualité. Il est recommandé enfin, de ne pas approcher la superficie à une source de chaleur directe.

### Rembourrage en polyuréthane «flexible»

Le rembourrage de certains articles Gaber est réalisé en polyurethane «flexible», injecté à froid, sans particules de CFC/HCFC (ODP=0, ne réduit pas la couche d'ozone), ignifugé en classe 1-IM UNI 9175/CMHR, selon les normes européennes en vigueur.

### Revêtement: tissus et cuir

Gaber a au choix une large gamme de couleurs et finitions, choisis parmi des tissus, des cuirs, des similicuir testés et garantissant une bonne résistance aux frottements, aux abrasions, à la lumière artificielle. Nous avons aussi une gamme de revêtements non feu.

## EMBALLAGE ET RECYCLAGE

Nos emballages sont conçus de façon à optimiser le transport et le stockage; ils sont réalisés à 90% avec du matériel recyclé et sont complètement recyclables. L'emballage, optimisé au maximum en ce qui concerne son volume et son poids, permet une économie d'énergie, de main d'œuvre et de coût du port, sans oublier la sauve garde de notre environnement. Il est vivement conseillé de monter complètement l'article Gaber avant de procéder à l'élimination du carton, ceci, afin d'éviter de perdre la visserie et/ou les divers composants de l'article en question. Lorsqu'un produit Gaber arrive en fin de vie, après l'avoir démonté selon la notice de démontage, il est vivement recommandé de porter le tout à la déchèterie la plus proche, selon la loi du pays en vigueur.

## USAGE INCORRECT DES PRODUITS

On utilise les tables, chaises, tabourets ou repose pieds de façon correct, il ne faut pas s'asseoir sur les dossier ou les accoudoirs ou se servir de ces articles comme escabeau. Il faut éviter de se balancer d'avant en arrière sur les assises, de façon à éviter les accidents. Pour soulever ou déplacer une chaise ou tabouret, on recommande de le prendre par le cadre et non par l'assise. Le produit ne doit pas être soumis à des charges excessives ou décentrées, il a été conçu pour un usage normal de simple appui au sol (sur 4 pieds ou sur pied central). Gaber décline toute responsabilité pour les dommages causés à personne ou choses, qui pourraient dériver d'un usage incorrect du produit. L'usine décline aussi toute responsabilité pour les dégâts sur parquets ou sol délicats.

## GABER® DOKUMENTATION

Die Dokumentation von Gaber beinhaltet technische Informationen und Ratschläge zur Nutzung von Gaber Produkten für Kaufinteressenten bzw. für Besitzer von Artikeln, die zur Produktpalette von Gaber gehören. Im Interesse der Kunden behält sich Gaber das Recht vor, die eigenen Modelle jederzeit abzuändern, ohne Pflicht zur Vorankündigung. Die Zeichnungen, die Quoten und die Masse, die Materialien und die Farben der Dokumentation dienen lediglich als Information und unterliegen Toleranzen. Die dargestellten Farbtöne, auch die in den Farbpälen, sowie die Lackierungen, Stoff-, Leder, Lack, Glas, Laminate-, Compactop-, Marmor-, Porzellan- und Holzverkleidungen sind Indikativ, da von Fall zu Fall Änderungen möglich sind. Gaber lehnt jegliche Verantwortung in Verbindung mit Farbtonabweichungen ab. Gaber behält sich zudem das Recht vor, die Produktion jedes einzelnen Produkts zurückzuziehen, einzustellen bzw. abzutreten. Gaber ist eine eingetragene Marke. Alle damit verbundenen Rechte an der Reproduktion von Kataloge und Preislisten von Gaber, in Bezug auf Texte, Bilder, Illustrationen, Zeichnungen, die sowohl mit mechanischen als auch mit elektronischen Mitteln, Kopien inbegriffen, erfolgen sind weltweit Gaber vorbehalten und benötigen eine schriftliche Genehmigung von Gaber.

## WARTUNG

Die richtige und häufige Pflege und Reinigung erhöht die Lebensdauer der Produkte: Beachten Sie die spezifischen Linien für jedes Produkt für Reinigungs-, Desinfektions- und Wartungstipps. Alle Wartungsarbeiten müssen von erfahrenem Personal durchgeführt werden.

## MATERIALIEN

### Kunststoffmaterialien

Die von Gaber benutzte "Tecnopolymer-Verbindung" für die Herstellung der eigenen Produkte sind durch hohe strukturelle, thermische und abriebfeste Resistenz gekennzeichnet. Das Tecnopolymer, welcher Bestandteile der Produkte von Gaber sind ungiftig, schmutzabweisend, antistatisch, wasserdicht und anti-UV. Die Eigenschaften der Produkte von Gaber verleihen eine optimale Resistenz gegen atmosphärische Einflüsse.. Das verwendete Tecnopolymer ist, in Beachtung der Umwelt, vollständig recycelbar. Gaber produziert thermoplastische Artikel ohne chemische Zusätze und, wo möglich, wird recyceltes Tecnopolymer aus wiederverwendeten Altstoffen benutzt. Produkte, die für den Außenbereich bestimmt sind, erleiden mit der Zeit die wetterbedingten Einwirkungen. Eventuelle oberflächliche Änderungen können aufgrund bestimmter Temperatur-, Feuchtigkeits- oder Salzgehaltsbedingungen auftreten. Die Kappen und Schutzvorrichtungen der Gaber-Produkte sind in einer Gummimischung mit hoher Verschleißfestigkeit gemacht, zur Reduzierung von Schleppgeräuschen. Einige Gaber-Produkte sind mit Filzstöpseln ausgestattet, die für starre und empfindlichere Böden geeignet sind. Einige Materialien aus tecnopolymer können kleine Fehler wie Schatten oder Streifen aufgrund der strukturellen Eigenschaften des Materials aufweisen. Gaber realisiert einige Produkte der eigenen Kollektion mit feuerfesten Tecnopolymer. Die Zusatzstoffe, die das Kunststoffmaterial feuerfest machen, können die Ästhetik und die Resistenz der Produkte grundlegend verändern.

### Stahl

Bei den Strukturen von Tischen, Stühlen und Hockern wird hochfester Stahl verwendet. Diese werden von Gaber mittels runder bzw. quadratförmiger Röhren realisiert. Die Produkte sind in verchromter oder lackierter Ausführung erhältlich. Die galvanischen Behandlungen und die spezielle Lackierung aus Epoxidpulver, die von Gaber an vielen Strukturen verwendet werden, erreichen eine optimale Resistenz gegen atmosphärische Einflüsse.

### Aluminium

Gaber nutzt Aluminium für die Herstellung der Strukturen von Tischen, Stühlen und Hockern. Mittels einer speziellen Verarbeitung der Oberflächen einiger Produkte von Gaber, des Anodisieren, wird die Korrosionsresistenz erhöht.

### Holz

Die Produkte von Gaber mit Holzelementen werden in Übereinstimmung mit den geltenden europäischen Vorschriften bezüglich der Emission von Formaldehyd hergestellt. "Compound-Wood" ist das besondere Material, das von Gaber für die Herstellung einiger Kollektion verwendet wird. Dieses Material benutzt die Holzfaser aus dem Produktionsprozess, mit welchem Gaber die Holzelemente herstellt. Die Holzoberfläche kann mit der Zeit durch die Benutzung oder die Sonneneinstrahlung eine Farbänderung erleiden, da es sich um ein natürliches Material handelt. Zudem sind die Oberflächen, aufgrund Ihrer Natur, leicht zu beschädigen. Einige kleine Unreinheiten und Macken liegen im annehmbaren Qualitätsstandard. Die Holzoberflächen verfügen keine direkte Wärmezufuhr.

### Polsterung in flexibles Polyurethan

Die Polsterung einiger Produkte von Gaber besteht aus flexilem Polyurethan, kaltgepresst, ohne CFC/HCFC (ODP=0: es trägt nicht zur Reduzierung der atmosphärischen Ozonschicht bei), selbstlöschend der Klasse 1-IM UNI 9175/CMHR, gemäß der geltenden europäischen Vorschriften.

### Bezüge: Stoffe und Leder

Gaber verwendet Stoffe und Leder, die zu einer umfassenden Palette an Farben und Mustern gehören, die alle aus einer Reihe getesteter Produkte ausgewählt wurden, mit dem Ziel die beste Leistung wie die Abriebfestigkeit und Resistenz gegen künstliches Licht zu erzielen. Es sind Kategorien feuerfester Stoffe und künstliche Lederbezüge erhältlich.

## VERPACKUNG UND RECYCLING

Unsere Verpackungen wurden mit dem Ziel realisiert den Lager und Transport zu optimieren. Sie bestehen zu 90% aus recycelten Materialien und sind vollständig recycelbar. Die Optimierung der Verpackung in Bezug auf Volumen und Gewicht führt zu einem geringeren Energieverbrauch, mit einer folgenden Einsparung bei den Transportkosten und einer wichtigen Hilfe zum Schutz der Umwelt. Um den Verlust von Bauteilen zu vermeiden, wird es empfohlen die Verpackung erst nach Abschluss der Montage der Produkte zu entsorgen. Nach der Montage kann das Produkt oder seine Bestandteile dem öffentlichen Entsorgungssystem gemäß den geltenden örtlichen Vorschriften übergeben werden, wobei die spezifischen Demontagekarten am Ende der Lebensdauer zu beachten sind.

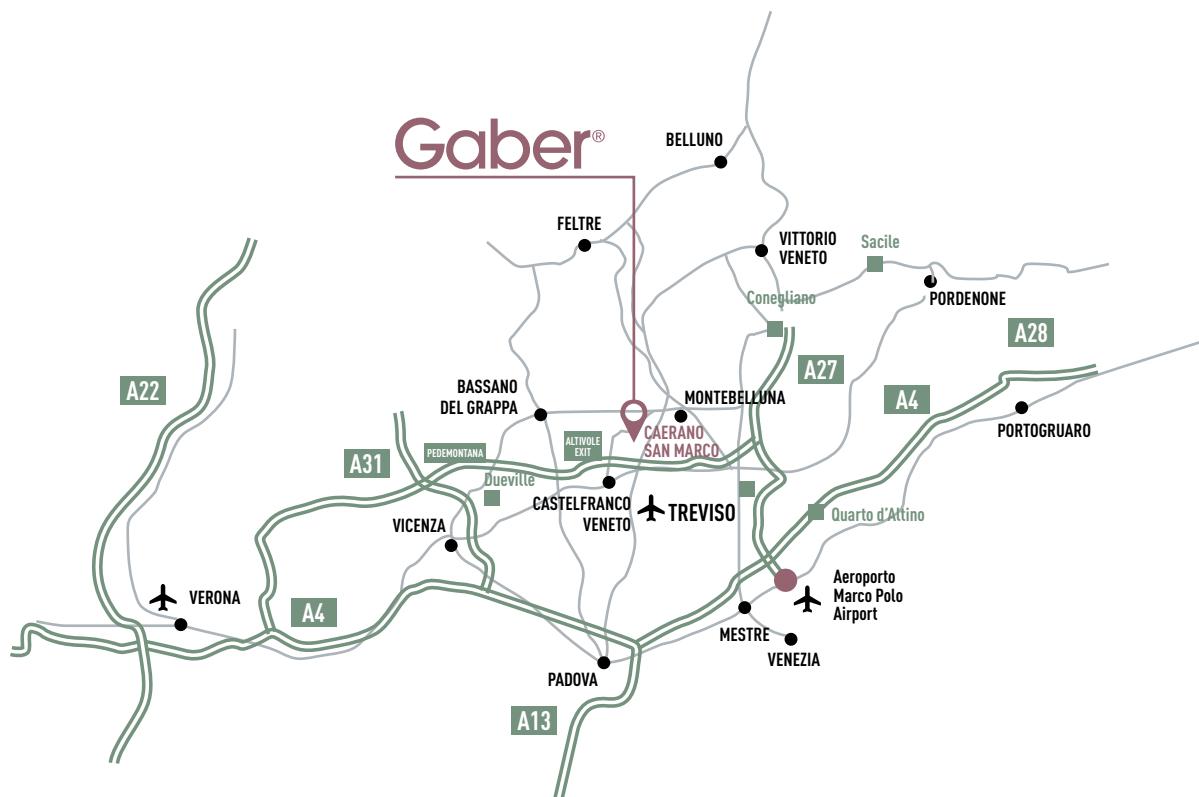

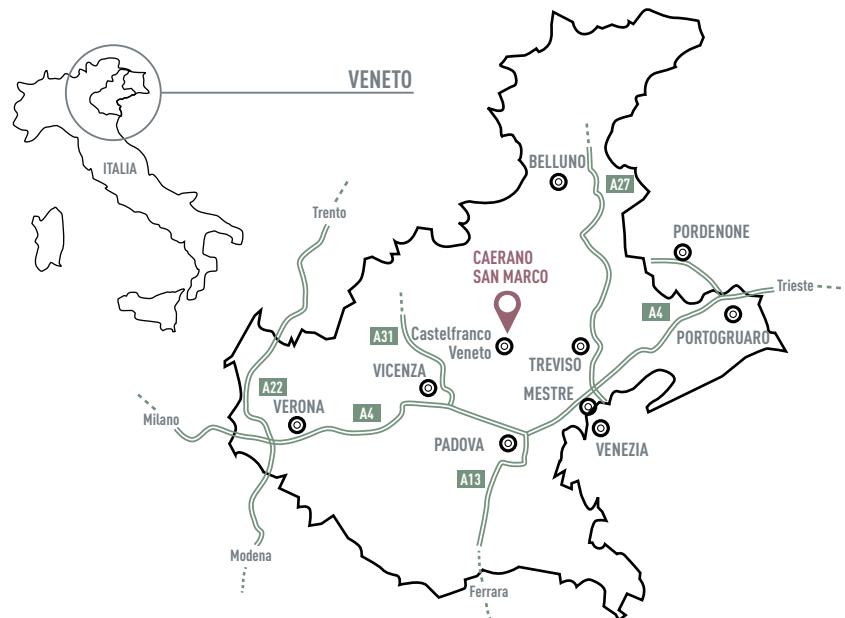

## UNSACHGEMÄSSE VERWENDUNG DER PRODUKTE

Als eine unpassende bzw. unkorrekte Verwendung der Produkte wird folgendes angesehen: Stellen auf Tische, Stühle und Hocker, Setzen auf Rücken- und Armlehnen, Nutzen der Produkte als Treppchen. Das Schwenken der Produkte könnte die Produkt oder deren Funktion beschädigen und die Sicherheit des Nutzers gefährden. Um das Produkt anzuheben oder zu verschieben wird empfohlen, es an der Hauptstruktur und nicht unter dem Sitz zu halten. Das Produkt sollte keiner dezentralen Last ausgesetzt sein, da es für die Nutzung in normalen Konditionen geplant wurde. Gaber übernimmt keine Haftung für Schäden an Sachen oder Personen, die durch unsachgemäße Verwendung der Produkte verursacht wurden. Gaber lehnt zudem jede Haftung für Schäden an empfindlichen Böden oder Oberflächen ab.
